

RISK MANAGEMENT FOR **ANIMAL WELFARE ORGANIZATIONS**

No matter the shape, size, or form of your animal welfare organization, we've broken the mold of the traditional, "one-size-fits-all" insurance approach by creating plans for a wide variety of non-profit animal welfare organizations. Make sure your coverage meets your risk, and have your insurance reviewed by our experts.

MEET OUR ANIMAL WELFARE INDUSTRY EXPERT, DENNIS BERNSTEIN

Meet Dennis Bernstein. Dennis focuses his efforts on the Animal Welfare industry because of his experience in nonprofit management and his love for animals. He understands the challenges of running a nonprofit and brings past experience to help you better manage your risk while also providing strategic advice.

The organizations I work with have a hard time finding the right insurance program since most carriers are concerned about the risks. The PIASC difference is that we have access to insurance protection packages that protect all the essential aspects of your organization.
